RE: EXP/007/016 +017
Carbon County, Utah

Dear Tom:

The Division has reviewed your exploration proposal and found that it meets the notice requirements of Rule M-3(5) of the Utah Mined Land Reclamation Act, 1975, Title 40-8 et seq, Utah Code Annotated, 1953. Because the operations will take place on private land and a copy of the lease agreement has been submitted, it is understood that arrangements have been initiated between all parties concerned insofar as final site abandonment.

It has been agreed upon by the operator, Mr. Thomas Kendrick, that prior to demolition or disturbance of any pre-existing structures, the State Historical Preservation Office will be notified for comment (Jim Dykman, 533-7039).

It will also be necessary for the operator to maintain adequate public access along the county road involved and post hazardous warning signs thereon. Additional considerations from the county will have to be followed regarding any regrading, widening or general improvement proposed for this access route and they will be contacted before such action occurs.

The rock extracted from this site will be removed via the county road to a leased plant site (Kaiser Steel Corporation) near Sunnyside. All water use rights are in the process of being obtained from private sources.

Based upon these considerations and those already submitted by Kendrick Brothers Construction Company, Inc., approval is given.

Sincerely,

THOMAS N. TETTING
ENGINEERING GEOLOGIST
